7.6.	D		
8.1.	exploring	4	
8.2.	themselves		
8.3.	compassionate		
8.4.	participants		
9.1.	to have been stealing	4	
9.2.	used to collect		
9.3.	was not allowed to		
9.4.	had been going out		
10.	Wyowiedź pisemna	13	
łącna liczba punktów		60	

PRZYKŁADOWA WYPOWIEDŹ PISEMNA NA 250 WYRAZÓW

There is a tendency for some studious learners to facilitate their learning process with artificial intelligence. From my personal standpoint, I consider it to be a beneficial mean in students' everyday preparation for classes, both in financial and time aspects and in the self-development of a student.

To start with, students can become more knowledgeable about every topic thanks to AI. To my mind, not only may they find a great variety of educational sources to practice specific material before a test, but also it seems to be supportive whenever they misunderstand something from their classes. Furthermore, AI allows us to dig more into the scope of our interest, browsing more content and broadening the limits of our knowledge.

As far as financial and time aspects are concerned, I really believe that browsing the net with the use of AI, instead of going to the library, might be less time-consuming, because with a click of a button we can get the results even faster. Moreover, we can benefit financially from using AI. Instead of spending money on physical books, we can save it on different things.

To sum up, I am still of the opinion that AI is likely to affect the development of a student in a positive way and make financial and time aspects better. It's obvious that people may see AI as a threat on the one hand, but let's remember that there is also a blessing in every new thing which we encounter in our life.
